

Fixture Type:

The Altman UV-150 is a compact, high-output blacklight, designed to provide high-intensity illumination of fluorescent materials at distances of up to 40 feet. The fixture is sealed and designed for wet locations, and does not require any fans for cooling, resulting in extremely quiet operation. An electronic ballast is integrated into the housing. The unit is wired with 14/3 Hi-Temp rubber cable, and is supplied with a clear safety lens.

Specifications subject to change without notice.

150-WATT OUTDOOR BLACKLIGHT Features

- Cast and spun aluminum construction
- Designed for portable or permanent, wet or damp installations
- Tool-free 360° lens rotation
- MUG-2 UV filter lens
- Interchangeable spread lenses available—very narrow spot through wide flood supplied with luminaire
- High-grade aluminum reflector polished to a mirror finish
- Axially mounted G12 lampholder
- Low-wattage lamps and high-efficiency reflectors drastically reduce power consumption and cost
- Two-position yoke adjustment
- Safety cable included
- Combination snoot / color frame / accessory holder available (dimensions below)
- U.L. and c.U.L. listed for wet location use. CE approved.
- Made in the U.S.A.

150-WATT OUTDOOR BLACKLIGHT

Specifications

Housing: Cast and spun aluminum with stainless steel fasteners and latches.

Materials: Corrosion-resistant materials and hardware.

Yoke: Rigid aluminum flat stock with dual locking handles and three mounting holes.

Reflector: High-grade aluminum, chemically polished and coated, parabolic design.

Lens: 8" (200 mm) borosilicate UV-A filter lens with an additional 8" clear narrow-beam safety lens.

Socket: 5 KV pulse-rated.

Ratings: 120-volt operation, 50/60 Hz, 150-watt T6 type lamp and 150-watt ballast. 240-volt AC and 277-volt AC operation available.

Ballast: UL approved electronic 150-watt ballast, tested and approved by the manufacturer carrying a limited 5-year warranty.

Cable: 4' insulated, 3-conductor.

Lamp Access: Tool-free by releasing latches and separating the two main castings.

Focusing: Function of lens selected; either round or oval beam shapes to be aimed at the intended subject.

Finish: Black epoxy Sandtex, electrostatic application.

Weight: Approx. 17 lbs. (7.7 Kg).
