...and 65 new glass patterns.

INTRODUCTION

Gobos are the foundation of Apollo. The knowledge, experience, tools, and resources we have to review, recommend, and transform custom artwork into detailed metal and high resolution glass gobos – for any light and application within the required timetable – is unmatched.

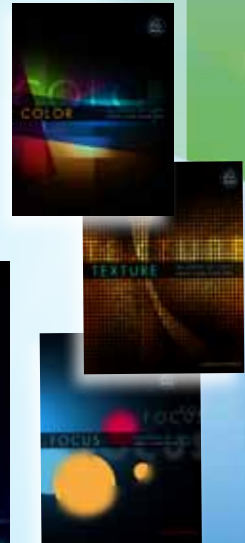

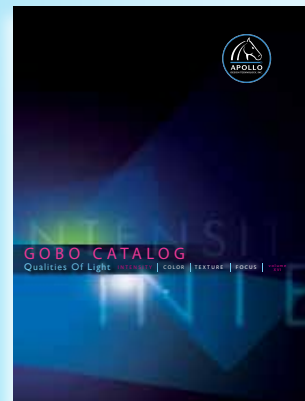

From Apollo's *annual* commitment to provide fresh, usable patterns to lighting designers around the world, our library of standard gobos has grown to become one of the most extensive in the industry. Introducing new designs is something you can count on from Apollo . . . *year after year*. While this catalog shows only a portion of the gobos we offer for providing ideas and solutions to your design needs, all Apollo patterns can be conveniently viewed at www.apollodesign.net.

Our process switch to new, clean laser technology from chemical etching for both metal and glass gobos also reinforces Apollo's leadership position in gobo manufacturing. The benefits of this change to the environment and workplace safety are important to many. But image detail, consistency, and overall product quality are important to everyone. As today's laser technology produces incredible gobos, Apollo confidently accepts any side-by-side challenge to showcase it.

As Apollo products are essential tools for lighting designers to create visually stimulating environments, the four qualities of lighting – intensity, color, texture, and focus – will be represented graphically in our product information resources.

INTENSITY. This quality of lighting begins with the light source and is influenced by many elements including the presence of ambient light and patterns. Apollo is committed, on a daily basis, to demonstrating our intensity for producing, delivering, and supporting gobos in ways that build the strongest relationships among dealers and end users.

CUSTOM ARTWORK REQUIREMENTS

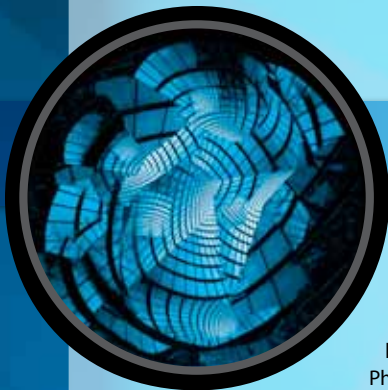

Metal: For custom metal patterns we prefer Adobe Illustrator files. We will accept a clean fax, ad slick, disc, or GIF, TIF, DOC, BMP, and JPG files.

B/W Glass & Color Glass: We prefer Adobe Illustrator files for logos and line art. The exception to this would be for a photo. In this case we prefer Photoshop files at 600 dpi resolution or higher. We can also accept an actual photograph or 35mm slide. MAC files should not be compressed.

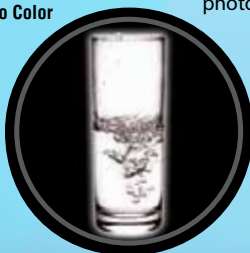

GIF, TIF, DOC, BMP, JPG files are rasterized and will need to be redrawn to become line art.

Contact your dealer for a quote.

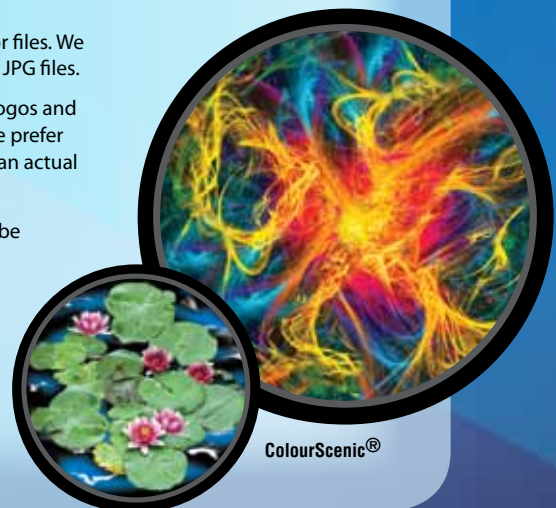

All our products are sold through a network of authorized Apollo dealers. If you do not have a dealer, please visit www.apollodesign.net and click the **Find a Retailer** tab, or contact Apollo for assistance.

Smart Move® Vertical is the latest addition to the Smart Move® family of gobo movement products. The Vertical features motion, time, and speed presets that create vertical movement of patterns or text. The special gobo offers multiple image areas that, when combined with the vertical movement, allow one image at a time to be placed in the focal path of the fixture. Compared to the spinning motion of a standard gobo rotator, the Vertical offers a different, more subtle look.

Use multiple Smart Move® Verticals simultaneously to create side-by-side effects at different angles. Add gel or crushed dichroics to enhance your projection with color. These are just a few suggestions for creating visual effects using the Smart Move® Vertical. We'll leave all the others to your imagination.

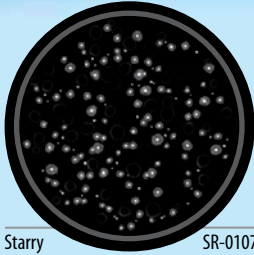

All vertical patterns on this page designed by K. C. Hooper.

			Overflowing Swirls	SR-1231	21	Worn Cloth	C2-1008	24			

Create memorable *custom wedding gobos* with Apollo's Wedding Templates.

Personalize your wedding reception by displaying your name and wedding date in lights. Bring your wedding color into play by adding an Apollo Gel color. Personalizing your custom gobo can be done in three easy steps.

- (1) Select a layout (wedding/monogram number)
- (2) Select a font (using the font number)
- (3) Supply the details (names, dates, fixture, and quantity)

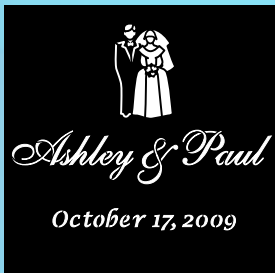

For all layouts and fonts go to www.apollodesign.net and click on Gobo Wedding Template.

Below is a small sampling of the romantic layouts Apollo offers.

Steel patterns not available for all lighting instruments. Size limitations required by small projectors exclude some availability. Consult an Apollo representative.

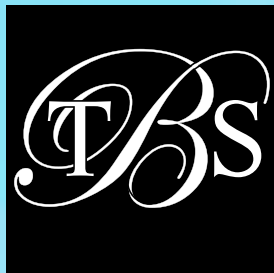

Layout - WL-10

Font - Shelley Allegro BT (F-40)
Lucidia Calligraphy Italic (F-26)

Layout - M-2

Font - Edwardian Script ITC (F-13)
and Elison (F-14)

Layout - M-5

Font - Edwardian Script ITC (F-13)

Layout - SL-1

Font - Edwardian Script ITC (F-13)
