# FOUR & SIX GOBO TRAYS

## SX4® GOBO AND COLOR CHANGER

SX4® Gobo Trays  
 US Patent # 6,926,427  
 August 9, 2005

The GAM SX4® Gobo and Color Changer System offers a choice of two trays that snap into an ETC Source Four as pictured above. It can be fully DMX controlled and also has built-in programs for automatic pattern changes where a light board may not be available - ideal for display applications. Using the built-in programs you can select speed, direction, and lapsed time of pattern changes, and it will automatically sequence when power is turned on. The Gobo Trays use the same power supply as the GAM Indexing TwinSpin™ and are compatible with some popular power supplies. An excellent choice for display, retail, theatrical or special event applications. You can choose from over 800 off-the-shelf patterns. The Four-Gobo Changer uses any 'B' size pattern and the Six-Gobo Changer, any 'M' size.

TS6240 - B SIZE

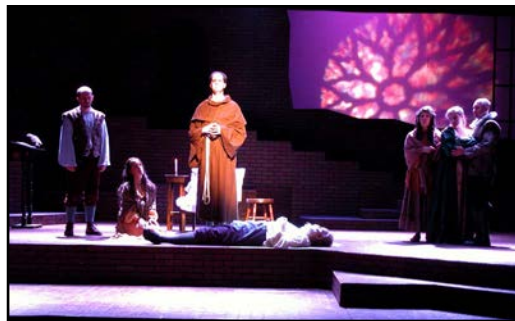

TS6220 - M SIZE

## PATTERN EFFECTS

Spaceship B #526

Man of La Mancha production, photos courtesy of Joseph P. Oshry

Great American Patterns® are chemically etched in high temperature resistant stainless steel. Often called “gobos”, they are designed to be used in the gate of an ellipsoidal spotlight to project images. GAM pioneered the off-the-shelf pattern and offers them in eight traditional sizes. They can also be cut with scissors to fit almost any pattern holder. Using scissors and GAM Gobo Tape, patterns can be altered to create unique images and two patterns can be combined in the same pattern holder or by superimposing projected patterns from two fixtures. Superb quality and overnight service: When you want the best, insist on GAM Patterns.

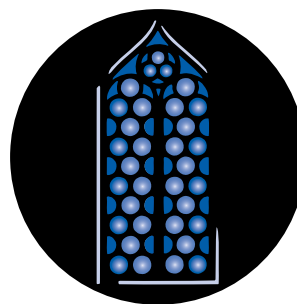

## PATTERNS ARE AVAILABLE IN COLORED GLASS

Stained Glass with Cross

American Flag

Blue Stained Glass

Rainbow

## Combination Patterns:

For more Combination Pattern info, visit [www.gamonline.com](http://www.gamonline.com)

GAM Patterns designed to be used in combination to create a more dramatic and complete effect. Enhance the effect by adding color to the individual instruments to give the image movement and depth.

# SX4® SCENIC PROJECTION SYSTEM PATENTED

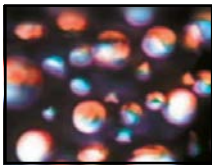

A SCENIC PROJECTOR, GOBO CHANGER OR COLOR CHANGER

## SX4®EFFECTS

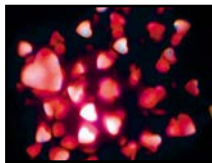

Swimming Fish

Floating Bubbles

Moving Clouds

Cupid's Hearts

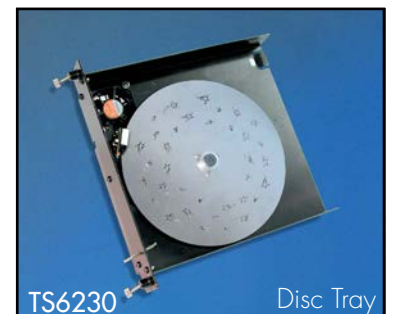

## SLIDE-IN, INTERCHANGEABLE TRAYS WITH DMX CAPACITY

- LOOP TRAY utilizes over 40 GAM Pattern FX/Loops for scenic projection.
- SIX-GOBO TRAY allows you to use any 'M' size gobo in glass, metal or dichroic color filter.
- FOUR-GOBO TRAY allows any 'B' size pattern.
- DISC TRAY takes an 8.5 inch FX/Disc. See Disc selection on page 22.
- SX4® can revert your Source Four to a conventional ellipsoidal quickly and easily.
- Built to sustain the rugged demands of the theme park, retail and architectural markets.
- SX4® achieves an amazing 4000 hours or more of pattern loop life.

See pages 20 & 21 for Pattern Loop selection

Four choices of spotlights to choose from. Either the 575 watt or 750 watt incandescent, long-life 150 watt HID, or a super bright 575 watt HMI™ GAM conversion. The SX4® system is easy to mount to the spotlight. Loosen two screws, snap the SX4® in place, tighten the two screws and in less than a minute you have converted your light to a very effective scenic projector. Moving clouds, gently falling snowflakes, raindrops, water ripples, fire, moving backgrounds, fish swimming, bats flying and so many more effects you can easily create with the SX4®. Extremely rugged, long-life effects (i.e. 4000 hr. loop life) make this an ideal source for display, theme park applications and theatrical productions of all kinds.

The SX4® Loop Tray can be operated using a dimmer for varying speed. The gobo changers and disc rotator can be operated with DMX signal and used with built-in preprogrammed sequences for displays. Please see page 38 for DMX power supply options. To learn more about this remarkably compact and efficient projector you can view the SX4® specifications and operation instructions on our website, [www.gamonline.com](http://www.gamonline.com) or call for more details.

# FILM/FX™ DROP-IN MOTION LOOP PATENTED

## ECONOMICAL MOVING EFFECTS

The GAM Film/FX's™ patented design fits into the drop-in iris slot of most ellipsoidal spotlights to create a compact and powerful scenic projector. Special effects such as moving clouds, rain, snow, fire, water, ripples and other spectacular elements are made easy. The diverse collection of GAM FX/Loops makes the Film/FX™ one of the most economical and efficient projection systems ever used for theatrical production. The in-line speed control option is also available for applications where dimmers are not available. Film/FX™ loop life is 100 hours. For longer life applications please use the SX4®.

- Available in 120 or 230 volt models
- Continuous pattern loop motion
- Wide variety of FX/Loops to choose from
- Supplied with single power supply that can be plugged into any AC outlet or dimmer for speed control
- See the full line in full motion videos at [www.gamonline.com](http://www.gamonline.com)
- See pages 20-21 for loops designated for Film/FX™

# Prismo™ NEW

THE GAM PRISM ROTATOR

## MOTION EFFECTS

- Multiply and animate your image with variable speed
- Fits ellipsoidal spotlights with 6.25 inch frame
- Speed range from 0.875 to 8.0 rpm
- Supplied with either 3 or 5 facet prism
- Create multi-colored images
- Designed for continuous duty cycle
- 120v or 230v models

TS7100 Prismo™ with 3-Facet Prism • 120 volt  
TS7102 Prismo™ with 3-Facet Prism • 230 volt  
TS7200 Prismo™ with 5-Facet Prism • 120 volt  
TS7202 Prismo™ with 5-Facet Prism • 230 volt

You can add color to the prism by simply taping triangles of GamColor® to the individual facets. This will create spectacular colored effects well worth exploring.

## TWINSPIN™ THE ORIGINAL DUAL PATTERN ROTATOR

YOUR CHOICE: VARIABLE SPEED • INDEXING DMX CONTROLLED • FIXED SPEED

Variable Speed TwinSpin™

Indexable TwinSpin™, DMX Controlled

TwinSpin™ Jr. with Variable Speed

Choose any two patterns in the GAM catalog and create thousands of different kinetic looks. The variable speed TwinSpin™ can simply be plugged into any dimmer to control the speed, or choose a model with an in-line speed control. \* Indexing TwinSpins™ are also available for DMX control as well as fixed speed and SoloSpin™ models to choose from. GAM offers 16 models of the TwinSpin™ including Indexing, DMX Controlled, and Jr. TwinSpins™ to fit a variety of popular light fixtures.

- Excellent choice for continuous long time applications.
- Visit Virtual TwinSpin™ at [www.gamonline.com](http://www.gamonline.com) to see any two GAM Patterns you select rotating as in a TwinSpin™.

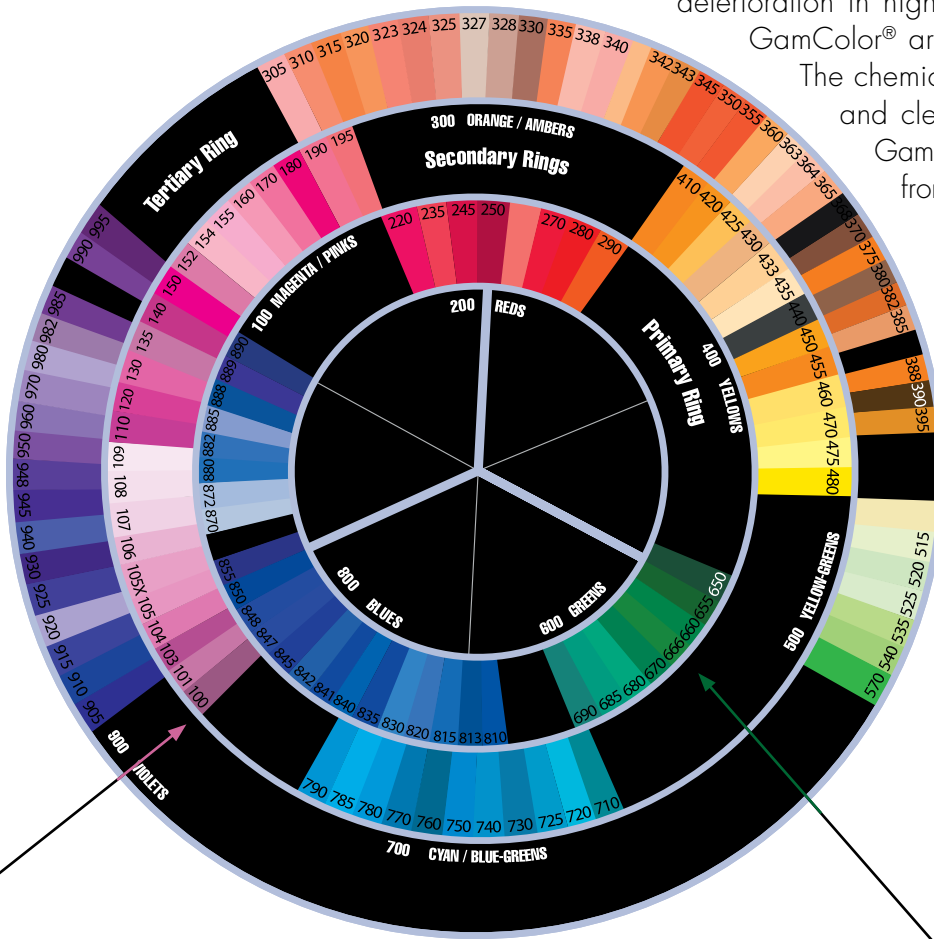

GamColors® are numbered in sections:

- 100 – Magenta
- 200 – Red
- 300 – Orange
- 400 – Yellow
- 500 – Yellow Green
- 600 – Green
- 700 – Blue Green
- 800 – Blue
- 900 – Violet

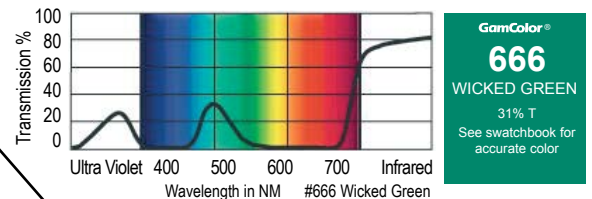

GamColor® is deep dyed in a high temperature resistant polyester with a melting point of 480°F (250°C). The GamColor® swatchbook is chromatically arranged and provides a sample of each color along with a full spectral analysis. Adhering to that analysis is one way we ensure that GamColor® is consistent in color and performance now and into the future. Each carefully formulated color goes through a rigorous quality control procedure to ensure your satisfaction every time you use GamColor®. Because it is deep dyed, the color will not scratch off the surface and is optically clear. The clear polyester base is highly resistant to tears, punctures, cracking and deterioration in high heat applications. The dyes used to produce GamColor® are the most stable and heat resistant available.

The chemical process ensures that the colors will be clean and clear with excellent transmission and consistency.

GamColor® quality control includes constant monitoring, from raw material to finished product.

### USING THE GamColor® WHEEL TO FIND COMPLEMENTARY COLORS.

After you have selected a GamColor® from your swatchbook, locate your color on the wheel and look across the wheel for a selection of complementary colors.

The GamColor® System divides the visible spectrum into nine color sections that are convenient to the lighting designer. It is a circular classification of colors by hue, referencing the primaries, secondaries and important subdivisions. The GamColor® Swatchbook is arranged according to this chromatic sequence, making it easy to locate a color in a logical manner. As new colors are added, they will be numbered and positioned properly on the wheel and in the book. Use this color wheel to find complementary color schemes.

Spectral Distribution charts can be seen online or in our swatchbooks

## NUMERICALLY ARRANGED IN CHROMATIC SEQUENCE

Large format designer swatchbooks are available in two sizes. Both GamColor® books contain samples of the complete line of our high quality deep dyed polyester filters, CineFilters™ and Diffusion materials.

# CINEFILTER™

## CORRECTION FILTERS, AND NEUTRAL DENSITY

GAM CineFilters™ are used to change the color temperature of a light source and to color balance the lighting in the scene.

- CTO to modify sunlight coming through a window to match incandescent light sources.
- CTB to change an incandescent light to match daylight.
- (ND) Neutral Density to reduce the light without shifting the color temperature.
- (MG) Minus Green to eliminate the green peak output of fluorescent lights and many discharge lamps and is ideal for eliminating the peak green outputs of HMI™ lamps.
- (PG) Plus Green shifts incandescent sources towards the greenish color of fluorescents.

Some CineFilters™ are available in WindowGrip™ adhesive backing for application to windows (see page 31). For cosmetic gels see Naked Cosmetics® on page 32.

CineFilter™ mounted on Light

# CineFilters™

GAM's 3 1/4" x 4" Cinefilter™ Swatchbook is full of useful information on color correction.

**GamColor®**  
**1526**  
**3/4 CTB**  
Light loss = 1.3 Stops  
31% Transmission  
Mired Shift = -108

Convert 3200°K to 4750°K. Also converts sources slightly bluer than 3200°K to 5600°K. Can be used with other correction to achieve a specific color temperature. Use on lights and windows. If used with + or - green will help correct some fluorescent or discharge sources.

Converts	→ To
3200°K	4750°K
5600°K	15,380°K
2380°K	3200°K
3490°K	5600°K

## COLOR SLEEVES FOR ANY FLUORESCENT TUBE IN ANY COLOR

- One Year Colorfast Warranty \*
  - Available in 4' and 8' Lengths
  - Available in 400' to 1000' Rolls
  - Genuine GamColor® Filter
  - Available in any GamColor®
  - Easy to Trim with Scissors to Fit Any Length Tube
  - Folds Flat for Economic Shipping
  - Installs Quickly and Easily
  - Perfect for Architectural & Display Applications
- \* See warranty details on website

GamTubes™ are colored filter sleeves that slip over fluorescents to correct or change their color. They're an excellent and economical choice to simulate neon, reduce glare or achieve color correction. GamTubes™ are available for every fluorescent lamp from T-2 to T-12. They're also available for biaxial & compact fluorescent lamps.

## GAMTUBE™ UV SHIELD PREVENTS COLORS FROM FADING

Slides on for Easy Installation

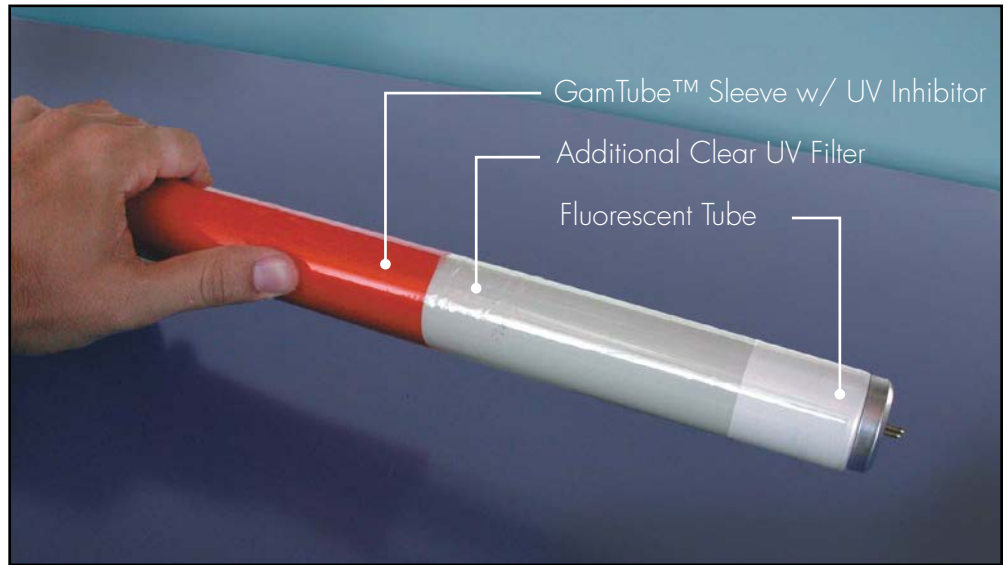

Fluorescent lamps generate high levels of ultraviolet energy which is detrimental to dyes in fabrics, paintings, drawings and other art work. GamTube™ UV Shield is an extremely effective way to protect your valuable items. Use alone or layered under a colored GamTube™. GamTubes™ are easy to install, reusable and flexible, and fold flat for storage and shipping. UV material is also available in sheets and rolls and in WindowGrip™.

## ADDITIONAL UV PROTECTION FOR EVEN LONGER COLOR LIFE:

- One Year Colorfast Warranty \*
- Available in any GamColor®
- Installs Quickly and Easily
- Available in any Size & Length
- Can be Trimmed with Scissors

SuperTubes™ are similar to GamTubes™ but designed for even more demanding applications, with a ONE YEAR NON-FADE WARRANTY!\* SuperTubes™ utilize a unique double UV protection barrier system that gives twice the UV protection, critical for today's high output fluorescent fixtures. SuperTubes™ protect in two ways: with a clear UV reduction sleeve and then with an overlaid color sleeve, also with UV inhibitors. The two are welded together for ease of handling and installation. SuperTubes™ are available in ANY SIZE AND ANY COLOR.

\* See warranty details on website

## GAMTUBE ROLL

### DEEP DYED POLYESTER COLOR SLEEVE.

SLIPS OVER FLUORESCENT TUBES TO CORRECT OR CHANGE COLOR EMISSIONS.

- Select From any GamColor®, Neutral Densities & UV Filters
- Cut With Scissors To Fit Any Length
- Genuine GamColor® Filters
- Available in Rolls for Economic Handling and Shipping
- Installs Quickly and Easily
- Huge Savings on Large Jobs

OR

In Economic Rolls from 400 FT. to 1000 Feet Long

## BLACKWRAP™

BLACKWRAP™ IS GAM'S ACADEMY AWARD WINNING INDUSTRY STANDARD FOR BLOCKING UNWANTED LIGHT LEAKAGE

BlackWrap™ masks light leaks and conceals unsightly cabling. It is ideal for making a snoot or barn doors to control light. BlackWrap™ is .002 inch thick malleable aluminum, coated matte black on both sides. Available in four roll widths: 12", 24", 36" and 2" tape.

GAM introduced the original BlackWrap™ in 1983 and it quickly became an essential element in the electrician's toolbox. At the 2004 Emmy Awards, the Academy of Television Arts & Sciences presented an Outstanding Achievement in Engineering Development Award to GAMPRODUCTS for BlackWrap™.

ITEM #	DESCRIPTION	ROLL SIZE
BW2700	BLACKWRAP™	12" x 50' x .002"
BW2710	BLACKWRAP™	24" x 25' x .002"
BW2715	BLACKWRAP™	36" x 25" x .002"
BW2760	GAMWRAP™ HEAVY DUTY SILVER FOIL	24" x 25' x .002"
BW2780	BLACKWRAP™ TAPE	2" x 80' ROLL

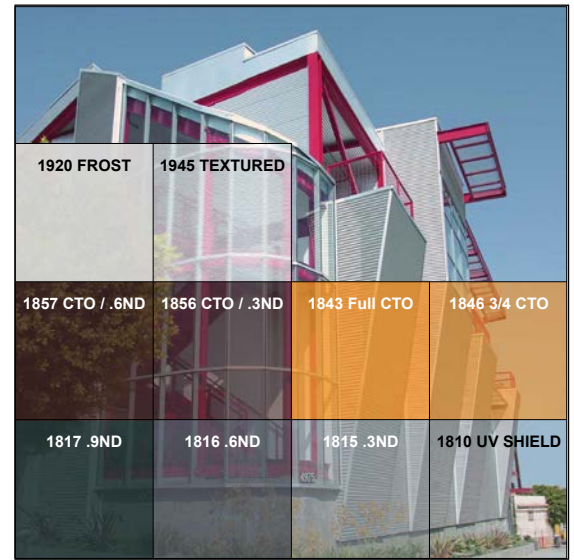

# WINDOWGRIP™

GAMCOLOR® WITH A LOW-TACK ADHESIVE SECURES , CTO, FROST AND UV FILM TO WINDOWS

REDUCE INTENSITY AND/OR CHANGE COLOR TEMPERATURE OF DAYLIGHT FROM WINDOWS!

GAM has applied an optically clear low-tack adhesive to its optically clear deep dyed polyester Cinefilter™ to create WindowGrip™. GAM Cinefilter™ is a color correction filter manufactured to stringent quality control standards from high-temperature heat-resistant and UV-protected materials. The resulting combination is a color correction filter that ensures consistent color quality for repeat reliability and superior performance. WindowGrip™ solves the color correction and intensity problems of sunlight coming through a window. WindowGrip™ adds a new dimension of control and flexibility not previously possible.

The full WindowGrip™ range.

We **STRONGLY** recommend that you use GAM squeegee to achieve the best Windowgrip™ application.

- Hard rubber edge easily pushes out water bubbles
- Durable plated steel with rubber grip

Apply to office windows

# NAKED COSMETICS®

Naked Cosmetics® blend and enhance skin tones while masking undesirable undertones. These subtle colors add natural beauty to your portraits without affecting the color of the entire scene.

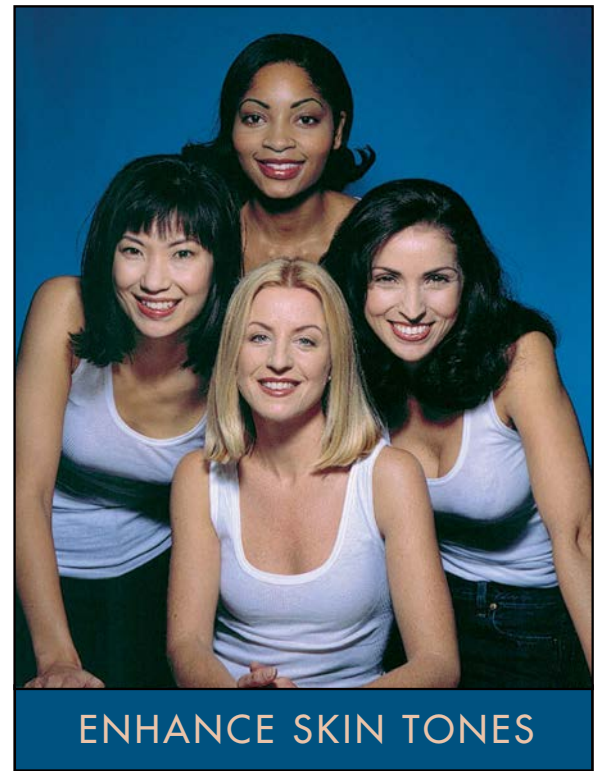

Naked Cosmetics® can lessen the apparent difference between skin colors by adding a hint of color to compliment each subject. Add GamFusion™ to achieve the desired amount of softening for the light source required to achieve the final image.

The choice of which Naked Cosmetics® to use depends on a few variables: Skin color of the subjects, costumes, make-up, recording medium, desired effect, and most important, your artistic taste. Naked Cosmetics® offer six subtle filter steps to modify skin tones. See your GAM CineFilter™ swatchbook for samples.

Available in sheets & rolls

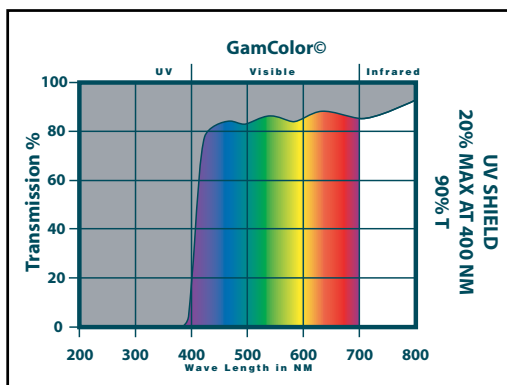

# UV PROTECTION

PROTECTION FROM THE HARMFUL EFFECTS OF ULTRAVIOLET LIGHT.

EFFECTIVELY ELIMINATES 97% OF THE UV RADIATION

Protect your photo from fading

Fluorescent lamps and sunlight emit high levels of UV light. High energy radiation in the 200 to 400 nanometers segment of the electromagnetic spectrum can be most harmful to documents, paintings, photos, parchment, dyes and pigments of all kinds. GamColor® clear colorless polyester UV Film effectively eliminates 97% of the ultraviolet radiation in the wavelength band from 200 to 400 nm, preventing colors from fading. GAM UV protective materials have been approved by the American National Standards Institute (ANSI) for the protection of stored or displayed photographs. Film is available in sheets, rolls, Windowgrip™ and GamTube™.

UV Protected

Non UV Protected

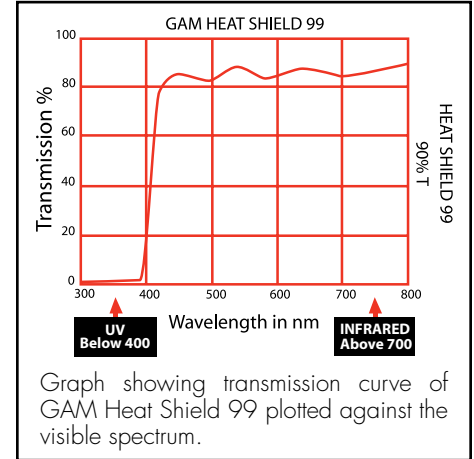

# HEAT SHIELD 99

## EXTEND COLOR FILTER LIFE

### OPTICALLY CLEAR THERMAL INSULATOR

GAM Heat Shield 99 protects color filters (gels) from fading and warping due to prolonged exposure to high intensity light sources. The melting point for Heat Shield 99 is 480°F (250°C). The chart to the right illustrates the percentage of light transmission throughout the visible spectrum at more than 90% with an almost complete elimination of color fading UV.

Available in sheets & rolls

Position Heat Shield 99 between the light source and the color filter. Separate the two elements by approximately one inch (2.5 cm), allowing air flow between the two to dissipate heat.

# GAMFUSION™

## SOFTEN AND DIFFUSE YOUR LIGHT

GamFusion™ is a carefully developed system of materials designed to soften and diffuse the light beam. GamFusion™ can be used to smooth the beam of an uneven spotlight without disturbing its normal hard edge. Each sequential step is progressively more diffuse. The 10-90 is ideal for light boxes and situations where the audience or camera might look directly into the light source. Stronger diffusions create a soft light quality when using a Fresnel lens spotlight. Two diffusions are available in WindowGrip™ with adhesive backing for application to windows (see page 33).

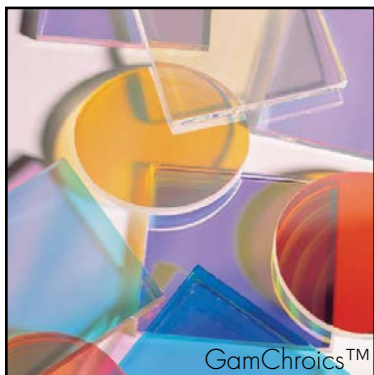

- 10-10 Evens Light Beam, Softens Edge
- 10-20 Slightly Diffuse
- 10-30 Softens Hard Edge of a Spotlight
- 10-40 Barn Door and Shutter Control Affected
- 10-50 Soften Beam and Spreads Light
- 10-55 Softens the Beam Further
- 10-60 Diffusion Very Apparent
- 10-70 Beam Hardly Perceptible
- 10-75 Almost Total Elimination of the Beam
- 10-80 Eliminates Beam Edges
- 10-90 Total Diffusion (Excellent for Lightbox)
- 10 Medium GAM Frost
- 15 Light GAM Frost
- 32 Full GAM Spun
- 38 Light GAM Spun
- 45 GAM VEL (Available in 72" wide rolls)
- 65 Medium GAM Silk - (Directional Spread)

Available in sheets & rolls

# GAMCHROICS™

## HIGH TEMPERATURE & HEAT RESISTANT

### DICHROIC GLASS COLOR FILTER AVAILABLE IN HUNDREDS OF CUSTOM COLORS AND SIZES

Precise optical coatings on glass make a highly heat resistant, durable and long lasting color filter that is ideal for low maintenance installation. Manufactured to high standards, GamChroics™ are available in a variety of traditional color filter sizes and shapes for ellipsoidal spotlights, PAR units, MR-16s and more. They may also be ordered in custom sizes and colors to meet your special requirements. GamChroics™ are available in Ultraviolet (UV) and Infrared (IR) (filters or reflectors) as well as combination UV and IR.

# GAMFLOOR™

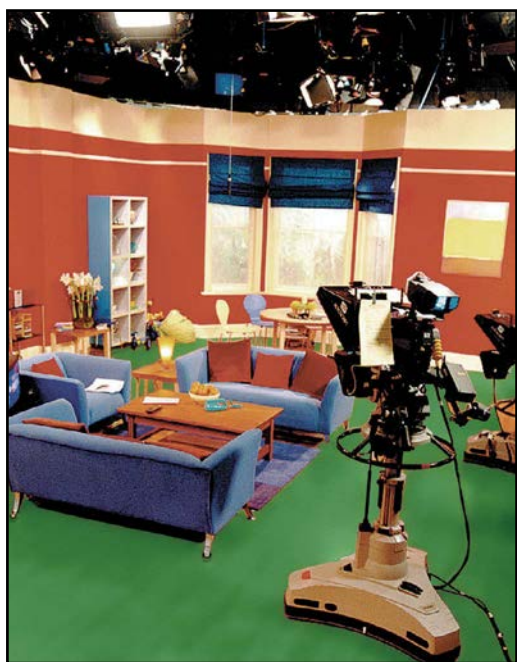

## INSTANT FLOOR FINISH FOR YOUR SET, STAGE, STUDIO OR DISPLAY

A durable self-adhesive vinyl floor covering available in a variety of matte and gloss colors. Easy to install, GamFloor™ is flexible enough to conform to moderate contours and can last for months, after which it can be easily removed and discarded, leaving no residue. The 4 mil thick vinyl finish is dyed through, producing matte finishes much softer and gloss finishes much shinier than any paint. Its dense opacity covers any color with no drying time or toxic paint odors. GamFloor™ eliminates messy clean-ups and can be applied to most smooth vertical and horizontal surfaces; concrete, vinyl, wood, painted finishes, glass and plaster. 1,000 sq ft of GamFloor™ can be applied in about one hour and can be walked on immediately after application. In 10 minutes GamFloor™ can be removed, restoring the original surface, quickly, easily, and economically.

## TEMPORARY VINYL FLOOR COVERING

# STARSTROBE™

- Double Xenon lamp provides super bright flash
- 60 Random flashes per minute
- Rugged molded black housing
- One-piece molded lens cap
- Reliable, solid state circuitry
- Run up to 50 or more StarStrobes™ on a single 20 amp circuit
- Speed control using an AC dimmer to vary the flash rate
- Remote control programmable StarStrobe™ option

The StarStrobe™ can hang from its cord or be permanently affixed to hard scenery. They are dazzling behind a scrim for star effects, or lining a proscenium or bandstand for eye-catching glitter. Color your StarStrobe™ by removing the cap and inserting GamColor®.

# GAMTORCH™ PATENTED REAL FLAME SELF-EXTINGUISHING TORCH

- Tested and proven in hundreds of stage performances and outdoor spectacles.
- Produces 16 inches of real flame from solid GAMFuel™ pellets.
- Virtually smokeless and odorless, GamTorch™ is non-toxic and clean burning.
- A real flame source that is environmentally safe and economical.
- Automatically self-extinguishes if handle is released for any reason
- GamTorch™ has been approved for theatrical use by fire marshals worldwide.
- GamTorch™ weighs only 2.9 lbs (1.2 kg) and measures 21.5 in (55 cm) with a 1.8 in (4.4 cm) diameter.

Example of Customer Dressed GamTorch™

## DMX POWER SUPPLY

### DMX CONTROL FOR INDEXING ROTATORS, SX4® FOUR-GOBO, SIX-GOBO AND DISC TRAYS

A variety of power supplies are available for driving GAM Special Effects devices. Some are for the Indexing and/or DMX controlled units and some are for the Variable Speed Dimmer controlled units. All power supply options are available in 120v or 230v models.

#### INDEXING DMX CONTROLLED POWER SUPPLY

##### DUAL POWER SUPPLY

This will drive the two units as commanded by the DMX signal.

##### EIGHT CHANNEL POWER SUPPLY

Eight separate channels of DMX control to drive six separate circuits. Each circuit can handle up to four units daisy-chained together.

#### POWER SUPPLY FOR VARIABLE SPEED DEVICES

##### SINGLE POWER SUPPLY FOR SX4®

Compatible with most dimmers for speed control.

##### SPLIT POWER SUPPLY FOR®

Allows for separate control of fan and speed control via dimmer.

TSPS-10

# STIK•UP™

## COMPACT MULTIPURPOSE LUMINAIRE

Stik•Up™ goes where no light has gone before. The ultra light but sturdy wire frame construction weighs only 4 oz. (9 oz with lamp and cord) which allows it to be mounted in any position, by almost any means. Tape it to a stand, hang it with picture wire, secure it with gaffer's tape, or even a clothespin (C-41)! Snap-on extension arms support the use of color, correction filters and diffusion material. Use BlackWrap™ to create barn doors. Go anywhere in the world with a Stik•Up™ three light kit. It includes three lamps of your choice and arms in a sturdy, molded foam compartmented case. Complete Stik•Up™ Kit weighs only 8.2 lbs and measures only 16-1/4" x 20" x 5.5". GAM's Stik•Up™ Kit is the ultimate in flexibility and portability. Stik•Up™ can be operated at 12v, or at 120v or 230v. Just select the appropriate lamp.
