

Some of the interactive/useful features besides just viewing the pages on screen are:

- **Bookmarks** - if you go to "Window" "Show Bookmarks" by clicking on any of the categories shown, will jump you to the pdf page that the category begins on.
- **Web links** - when you are at any of the steel pages, on the bottom of the page is a box saying "web link to view more designs". If you click on this box, it will open the Rosco web site to the page of that category showing the \*additional\* web only designs (the ones not shown in the print catalog - scroll down the web page until you see the type in red)
- **Find feature** - If you go to "Edit" and "Find" you can enter any gobo number or name and it will take you the page and highlight what was found

For other info on getting around a pdf file go to "Help" - "Reader Guide"

Rosco's ColorWaves™ are a new idea in glass gobos to help create vibrant colored textures and shapes. Each gobo is a Rosco Image Glass texture, coated in one of five brilliant dichroic colors. The results, when projected in an ellipsoidal luminaire or moving light, offer a remarkable and unique combination of color, texture, shading and blending.

Size Available: "B" size (86mm); Moving Light Sizes available by special order  
 Max. Wattage: 600 Watts  
 Holder Requirements: Iris Slot Holder (See more information on page 24.)

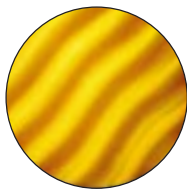

*When used with a steel gobo, the steel gobo must be farthest from the light source to allow for sharp focus. Where possible, install coated side (textured side) towards the lamp. Keep free of fingerprints and oils.*

*All Rosco glass gobos can be used in Rosco Gobo Rotators. Other gobo rotators may require adaptor rings or spring clips for proper sizing and fit. Contact the manufacturer for more details.*

Rosco's Colorizer gobos can be used to create stunning multi-colored effects. They fit a standard theatrical ellipsoidal fixture that accepts the Rosco "Standard B" size glass gobos. Colorizers can be used alone to achieve colored projections or paired in a gobo holder with a stainless steel pattern for new dramatic effects.

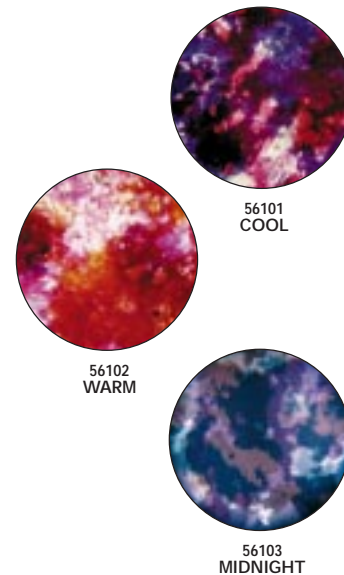

Size Available: "B" size (86mm); Moving Light Sizes available by special order  
 Max. Wattage: 1000 Watts  
 Holder Requirements: Glass Channel Holder or Iris Slot Holder (See more information on page 24.)

All Rosco glass gobos can be used in Rosco Gobo Rotators. Other gobo rotators may require adaptor rings or spring clips for proper sizing and fit. Contact the manufacturer for more details.

### STIPPLED SERIES

### FREE FLOW SERIES

### FEATHERLIGHT SERIES

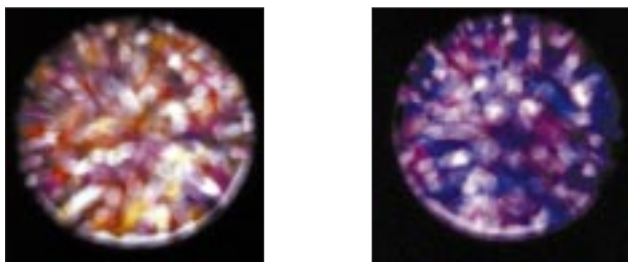

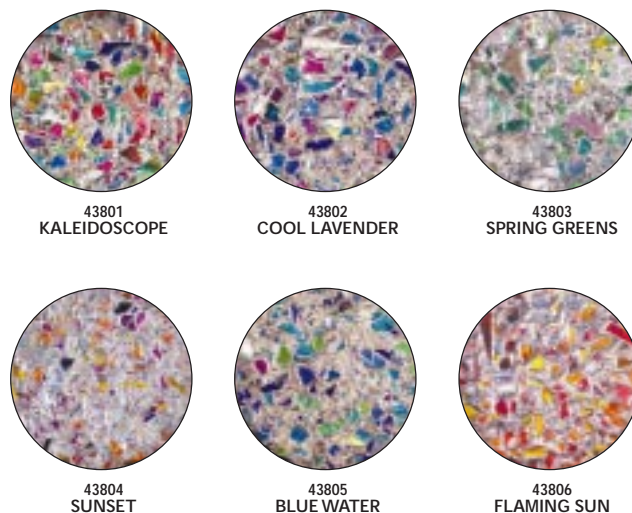

Prismatics are multi-colored texture gobos, made up of tiny chips of dichroic colored glass. Use Prismatics alone, combine them with other gobos (steel\* or glass) or use them in the Double Gobo Rotator for remarkable moving effects. Six different color styles give a lighting designer maximum creative options.

Size Available: "B" size (86mm); Moving Light Sizes available by special order  
 Max. Wattage: 600 Watts  
 Holder Requirements: Iris Slot Holder (See more information on page 24.)

\*When used with a steel gobo, the steel gobo must be farthest from the light source to allow for sharp focus.

All Rosco glass gobos can be used in Rosco Gobo Rotators. Other gobo rotators may require adaptor rings or spring clips for proper sizing and fit. Contact the manufacturer for more details.

Examples of Prismatics projected:

#43804

#43802

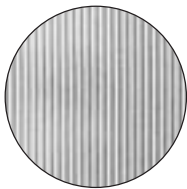

Image Glass gobos are deeply textured glass that refract and bend light into intricate patterns of light and shadow. Altering the sharp focus of the fixture transforms the image into a wide range of other textures. Image Glass creates stunning looks when combined with other gobos and color. Spectacular animated effects can be created by using Image Glass gobos in Rosco's Double Gobo Rotator.

Size Available: "B" size (86mm); Moving Light Sizes available by special order  
 Max. Wattage: 600 Watts  
 Holder Requirements: Iris Slot Holder (See more information on page 24.)

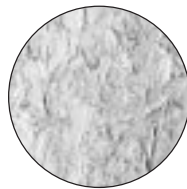

All Rosco glass gobos can be used in Rosco Gobo Rotators. Other gobo rotators may require adaptor rings or spring clips for proper sizing and fit. Contact the manufacturer for more details.

Signature Series gobos were designed by some of the most popular lighting designers in both theatre and music touring and those designers are credited on these pages. There are no tooling charges for Signature Series gobos, so this is an economical way to get strong images into your moving lights.

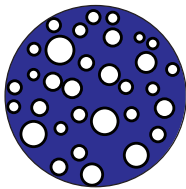

Size Available:: 20mm – 100mm  
 Max. Wattage: 600 Watts (1200 watts in Moving Lights)  
 Holder Requirements: Iris Slot Holder (See more information on page 24.)

*Where possible, install with coated side (textured side) towards the lamp. Keep free of fingerprints and oils. Clean only with very soft cloth and denatured alcohol. No ammonia products.*

## Steel Gobos

Steel Gobos can be used in the standard gobo slot of many ellipsoidal luminaires. Specify Holders as follows:

**No. 12586 B Size Tab-Style Holder**

Use for B size Steel in Altman and other common European luminaires.

**No. 13586 B Size Sandwich-Style Holder**

Use for B Size steel gobos in Altman and other common European luminaires.

**No. 13686 B Size Sandwich-Style Holder – ETC**

Use for B size steel gobos in ETC Source 4 and Source 4 750

**No. 13610 A Size Sandwich-Style Holder – ETC**

Use for A size steel gobos in ETC Source 4 and Source 4 750. It is necessary to trim the gobo with scissors to make it fit in the luminaire.

## Glass Gobos

Glass Gobos require gobo holders specially designed to hold the thicker glass patterns. Channel Holders can be used in the standard gobos Slot. Iris Slot Holders must be used in the Iris Slot

**No. 14579 BG Size Channel-Style Glass Gobo Holder**

Use for BG (79 mm) size Colorizers and B/W Spectrumgobos in Altman and other common European luminaires.

**No. 14686 B Size Channel-Style Glass Gobo Holder - ETC**

Use for B Size Colorizers and B/W Spectrumgobos in ETC Source 4.

**No.15786 Universal Iris Slot Holder**

Use for any B size Steel or Glass gobo in Altman Shakespeare, ETC Source 4, Strand SL, or Selecon Pacific. Double sided to hold two gobos.

What Gobo...?	In what Light...?	In what Size?	Use this Holder
Steel Gobo	Altman 6" ellipsoidals	B Size	12586, 13586 or 15786
Steel Gobo	ETC Source 4	B Size	13686 or 15786

B/W Spectrumgobo	ETC Source 4	B Size	14686 or 15786
1C Spectrumgobo	Altman 6" ellipsoidals	BG/B Size	14579 or 15786
1C Spectrumgobo	ETC Source 4	B Size	14686 or 15786
2C Spectrumgobo	Altman, S4, Strand SL, Selecon	B Size	15786
M/C Spectrumgobo	Altman, S4, Strand SL, Selecon	B Size	15786
Hi-Def. Photogobo	Altman, S4, Strand SL, Selecon	B Size	15786

\*Gobo must be trimmed in order to fit within the gate.

It may be possible to use Rosco glass gobos in holders and luminaires other than those listed here. Contact the manufacturer of the luminaire for further information. For a more complete compatibility chart see our website at: [www.rosco.com/gobocatalog/index.html](http://www.rosco.com/gobocatalog/index.html)

Mac 500	27.8mm	23mm	17mm
V	25.5mm	18mm	16mm
Mac250	22.5mm	18mm	14mm

## INDEXING DMX ROTATORS

Indexing DMX Rotators are available in either Single or Double Rotator configurations. They accept "Standard B" size (86 mm) steel or glass gobos and fit the iris slot of nearly all modern fixtures, such as the ETC Source Four, Altman Shakespeare, Strand SL and the Selecon Pacific. Using the built-in DMX protocol in the unit, you can control the speed and direction of the gobos' rotation. You can also control its indexing—where the gobos stop and for how long. This is particularly useful for repetitive or architectural effects, including shop display windows. A 24-volt power supply is required to operate these rotators. Because they use the same power supply used for scrollers, Rosco I-Cue units or other rotators may be "daisy chained" (or linked together with 4-pin scroller cable) to provide appropriate power for these devices. DMX cable is used to connect these rotators to your lighting control board.

No. 205 11100 0120  
No. 205 21100 0120

Single Indexing DMX Rotator  
Double Indexing DMX Rotator

*Rosco's Indexing DMX Rotators are addressed through rotary switches located just above the ports for connecting the device to and from the power source and the lighting control board.*

## VORTEX 360 DUAL ROTATOR

Rosco's newest—and lowest priced—Gobo Rotator offers the accuracy and reliability of its higher priced models, combined with the ease and convenience of plug and play operation without additional power supply or control requirements.

To operate the Rotator, simply plug it into any wall outlet or, with an adapter, into any convenient dimmer. Switches on the transformer/plug allow you to set the speed of rotation. If you're using a dimmer for power you can alter the speed by raising or lowering the dimmer setting on your lighting control board.

The VORTEX 360 Dual Rotator has two separate gear assemblies for double gobo effects. Its ultra-silent motor and stylish design make it ideal for architectural and retail applications as well as conventional theatrical use.

No. 205 83000 0120

VORTEX 360 Dual Rotator  
Plug and Play Model

## SINGLE GOBO ROTATOR

Rosco's Single Gobo Rotator is the basic tool for creating such theatrical lighting effects as simulated rain, snow, fire or reflected water. Designed for long-lasting professional use, it is exceedingly quiet and equipped with a high quality stepper motor and metal gear train. It fits the iris slot of most modern spotlights, including the ETC Source Four, Altman Shakespeare, Strand SL and the Selecon Pacific. It accepts "Standard B" size (86 mm) steel or glass gobos and rotates the gobo at either a fixed or variable speed, depending on the controller chosen.

The Single Gobo Rotator may be powered and controlled with either a Variable Speed Controller, a DC/DMX Controller or an MFX Control Adaptor, depending on your needs and applications. See page 28 for more complete descriptions of all three of these power devices.

No. 205 11000 0120      Single Gobo Rotator

## DOUBLE GOBO ROTATOR

Rosco's Double Gobo Rotator provides designers with exceptional versatility in a carefully engineered, highly reliable package.

The device accepts two "Standard B" size (86 mm) steel or glass gobos. They are affixed face to face in the optical path, secured with high temperature spring clips and aluminum retaining rings. This face to face configuration allows the two patterns to have a common center axis.

There are two separate metal gear chains directing the rotation of the two gobos. This allows you to simultaneously rotate either gobo in the same or opposite directions and at variable speeds. You can, for example, rotate one gobo in a clockwise direction at 4 RPM and the other in a counter clockwise direction at 10 RPM.

The Double Gobo Rotator fits the iris slot of most modern spotlights, including the ETC Source Four, Altman Shakespeare, Strand SL and Selecon Pacific. It requires external power and control with either a Variable Speed Controller, a DMX/DC Controller or an MFX Control Adaptor. See page 28 for more complete descriptions of all three of these power devices.

No. 205 21000 0120      Double Gobo Rotator

## VARIABLE SPEED CONTROLLER

The four-channel Variable Speed Controller will provide power, direction and speed control for four Single Gobo Rotators or two Double Gobo Rotators or four Animation Motor Units. One channel of drive runs one motor (Rosco Double Gobo Rotators are equipped with two motors each.) This low cost controller is an excellent solution for applications for analog (or non-DMX) control. Typical speeds generated by this device are 0-20 RPM for Single Gobo Rotators, 0-10 RPM for Double Gobo Rotators and 0-5 RPM for Animation Motor Units. The device includes load compensation and output protection circuitry. Output from the unit is via two 4-pin XLR female connectors on the rear panel.

No. 205 46000 0120 Variable Speed Controller

## DMX/DC CONTROLLER

The Rosco DMX/DC Controller provides power and speed control for four Single Gobo Rotators or two Double Gobo Rotators or four Animation Motor Units. Because it adds the convenience of the DMX512 protocol, effects can be programmed with other lighting directly into a cue sequence on a suitable lighting control console. The output circuitry of this device is two 4-pin XLR outputs and DMX pass through.

No. 205 45000 0120 DMX/DC Controller

## POWER SUPPLY UNITS

Rosco Power Supply Units are designed to control the I-Cue Intelligent Mirror and the DMX Indexing Rotators, both Single and Double. These devices deliver 24V DC via 4-pin XLR connectors. The Rosco PSU-02 will power four Single DMX Indexing Rotators, two Double DMX Indexing Rotators or two I-Cue Intelligent Mirrors. The Rosco PSU-08 will power 16 Single DMX Indexing Rotators, eight Double DMX Indexing Rotators or eight I-Cue Intelligent Mirror units.

No. 205 71402 0120 PSU-02  
No. 205 71408 0120 PSU-08

Note: The PSU 02 and PSU 08 have built-in voltage auto sensing. This allows the same power supply to be used for 100v, 120v and 240v operation.

**Note:** Rosco's DMX Indexing Rotator and I-Cue Intelligent Mirror have built-in DMX. Power for either of these two devices may be supplied by the Rosco Power Supply units described above, or from the power supplies used for operating scrollers. Many users find it convenient to "daisy chain" or link together the scrollers and the DMX Indexing Rotator or I-Cue or both, using a single power source for all the devices.

Rosco's Single and Double Gobo Rotators require separate power and control if your requirements include varying the speed or direction of the rotation motors. Either of the controllers described above are suitable.

The Rosco I-Cue Intelligent Mirror will re-position the beam of light so a single spotlight can be used for multiple specials in dozens of stage locations.

The device slides into the color slot of the ETC Sour Four, the Altman Shakespeare, the Strand SL and/or the Selecon Pacific. It includes onboard DMX so that the direction of the beam, as well as the speed of both pan and tilt functions of the Intelligent Mirror are directed through your lighting control board.

Most users report that adding Rosco's I-Cue Intelligent Mirrors to their spotlights sharply reduces the number of lights they have to buy, hang, or focus. Since I-Cue units can re-direct the light beam countless times during a performance, the need for individually focussed specials is virtually eliminated. Two, four or six spotlights—with I-Cues in their color slots—can do the job that formerly required 10, 12 or 20 spotlights and numerous dimmers.

Arraying two or more I-Cue equipped spotlights on a pipe can also simulate the effects of moving lights. These devices are virtually silent and their DMX-controlled movements can be in smooth unison or in separate directions.

The Rosco I-Cue Intelligent Mirror requires a 24-volt DC power supply. Multiple units may be "daisy chained" (linked together) with 4-pin scroller cable.

Rosco offers a choice of two power supply units. The Rosco PSU-02 will control two Rosco I-Cue units and the PSU-08 will control up to eight I-Cue units. Many of the 24-volt power supply units offered by such major manufacturers of color scrollers as Wybron, Rainbow, AC Lighting and Spectrum Manufacturing can provide power to the Rosco I-Cue and can be "daisy chained" with scrollers. For more information about Power Supply Units, see page 28.

The I-Cue is directed by its onboard DMX. A 5-pin DMX cable should be used to connect the power supply units with the lighting control board.

No. 205 81000 0120 I-Cue Intelligent Mirror

*Rosco's I-Cue sharply reduces the number of spotlights required for any performance, since a minimum inventory can handle all the "specials".*

## ImagePro™ Gobo Slide Projector

Rosco's new ImagePro™ Gobo Slide Projector offers users an easy, inexpensive solution for projecting photographic quality images in a theatrical setting. The ImagePro™ fits as an accessory into the iris slot of a typical ETC Source Four, Altman Shakespeare, Strand SL or Selecon Pacific light fixture. Fitted with an iPro Slide, the ImagePro™ delivers bright, visible full-color images that will last between 15 and 50 hours. Use it in a wide range of applications: for theatrical projections to create scenic elements, slide projections, lighting effects; especially suited for situations where budget is a primary concern, in trade shows and industrials where you need corporate logos, museum signage, exhibit identification, or any type of changeable backgrounds; in film and television projecting backings, special fx compositions, multi-colored cookies or photo-realistic settings.

265 25100 0120 ImagePro™ Gobo Slide Projector

## Hybrid Two-Fer

This optional accessory allows you to connect the ImagePro and your light fixture into the same dimmer. The two-fer is configured with a male stage-pin connector for the dimmer and both a female stage pin connector for the light and a female parallel blade connector for the ImagePro.

265 25500 0000 Hybrid Two-Fer

## iPro Slide Library

Choose any image from the Rosco iPro Slide Library for use in your ImagePro™. Designed specifically for the ImagePro™, Rosco offers images in a wide range of categories that are certain to suit your needs for most theatrical productions and live entertainment events. Fast turnaround makes the iPro Slide Library ideally suited for most designers. To see the designs, browse the CD catalog included with each ImagePro or visit the Rosco website at [www.rosco.com/imagepro/index.html](http://www.rosco.com/imagepro/index.html)

## Custom iPro Slide

Virtually any design you can create on your computer can be made into a Custom iPro Slide in just one day. Using Adobe Photoshop or similar software, prepare your design and send it to Rosco. Within 24 hours, your finished assembled iPro slide will be on its way back to you. For complete details and instructions on preparing artwork and ordering Custom iPro Slides, see our website at [www.rosco.com/imagepro/index.html](http://www.rosco.com/imagepro/index.html)

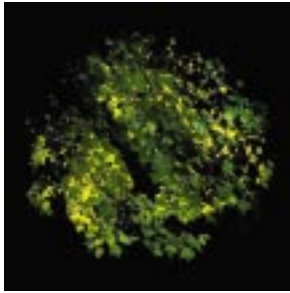

265 27000 0860 Custom iPro Slide

## iPro One-Time Slide Kit

For the unapologetic do-it-yourself technician, Rosco offers the iPro One-Time Slide Kit. This kit contains the slide mount and protective film necessary to make an effective iPro Slide. Using your own transparency film and your own printer to create the image, you can then assemble a finished iPro Slide. The Slide Kit is good for one slide only and is not designed to be re-used for multiple images. Since the quality of inks, printer technologies and plastic films may vary greatly, the performance of a home-made slide may not match those produced by Rosco.

265 27500 0860 iPro Slide Kit

See some examples of images from the iPro Slide Library on page 31 or go to the Rosco website to see the entire collection: [www.rosco.com/imagepro/](http://www.rosco.com/imagepro/)

Custom gobos are used in virtually every lighting project these days: special events, corporate industrials, retail store lighting, and, of course, theatre, film and television. Rosco will manufacture your unique design in *steel or glass*—*black and white or full color*— for ellipsoidal fixtures, moving lights or even extremely high temperature architectural units. Rosco's knowledgeable customer service staff will help you select the type of gobo most appropriate for your job.

## CUSTOM STEEL

Rosco Custom Steel gobos can be made in virtually any size or shape, in just 2 days! Your black and white artwork is the only thing required to start the process.

- Any size or shape.
- Etched from 5 mil, hard rolled stainless steel. Other thickness and other metals available by special request.

## CUSTOM HIGH TEMPERATURE SILK-SCREENED GOBOS

Using a proprietary heat resistant coating and durable Vycor™ glass, Rosco can make your design into an extremely heat-resistant glass gobo capable of withstanding the highest temperatures found in theatrical lighting fixtures, even 2500 watt HMI fixtures like the Robert Juliat profile spotlights. Because the coating is applied to the surface of the glass, both positive and negative images can be created, without any tabbing required. Very fine lines can be created, without any of the warping or burning normally associated with steel gobos.

- Available in "A" (100 mm), "B" (86 mm) and "BG" (79 mm) size.
- Guaranteed for 1 year in 1000 watt fixtures.

## CUSTOM GLASS SPECTRUMGOBOS

Rosco Spectrumgobos are the premier range of custom glass gobos, rendering black and white, photographic, and full color images. High resolution images achieve true photographic reproductions.

- Five categories are available:
  1. **B/W High Resolution** — Full photographic reproductions possible. (Standard delivery time: 3 days)
  2. **One Color** — Specify one of Rosco's 36 standard Permacolors, or choose from Library Color. (Standard delivery time: 3 days)
  3. **Two-Color** — Specify from Rosco's 36 standard Permacolors, or choose from Library Color. (Black is counted as a color.) (Standard delivery time: 5 days)
  4. **Multi-Color** — Three or more colors, limited only by color mixing technology. (Standard delivery time: 5 days)
  5. **High Definition Photogobos** — Three or more colors, limited only by color mixing technology. (Standard delivery time: 7 days)
- Spectrumgobos can be made in virtually any size from 20 mm – 100 mm.
- Available for most moving lights (1200 watt maximum) and ellipsoidal fixtures under 600 watts. Certain high temperature architectural fixtures like the Juliat may be used in certain instances.
- Digital artwork or camera-ready originals required.
- Proper care and handling of glass gobos, as well as correct installation and fixture adjustments will prevent problems arising while using glass gobos. Rosco's customer service department can advise on any questions you may have.
- Faster delivery is available, contact Rosco.

**For quick service and more information on custom gobos  
contact Rosco at 1-866-228-2256 or on the Rosco website at  
<http://www.rosco.com/gobocatalog/>**

HIGH DEFINITION  
PHOTOGOBO

## ORDERING PROCEDURES

- Specify the type of custom gobo needed and quantity required. If necessary, Rosco's customer service department will help you determine which type of custom gobo is appropriate for your project.
- Indicate size (outside diameter) of the gobo and the type of fixture being used (include image area measurements if specifying a non-standard size or shape).
- Submit your design as an electronic file, camera-ready artwork, or clean faxed art. (Faxes are acceptable for steel or silkscreen gobos only.)
- Tabbing, used to prevent the island areas of the design from dropping out during etching, will be inserted by our graphic designers (steel gobos only).
- Please indicate whether the artwork you submit is reversed so that white areas in the artwork will remain steel while the black areas of the artwork etch away, or whether the artwork represents the final projected image, with white areas in the design projecting as light.
- Indicate a required delivery time.

Custom Gobo Order Forms are available on the Rosco website: [www.rosco.com/gobocatalog/customgobo/orderform.html](http://www.rosco.com/gobocatalog/customgobo/orderform.html)

## SUBMITTING ARTWORK

### Faxes

Clean faxes required. Suitable for Steel and High Temperature Silkscreen. Clean up charges may apply for poor faxes.

### Camera-Ready

Camera-ready artwork may be submitted in a variety of formats: line art, logos, stickers, slicks, and photographs. Do not send artwork from magazines or newspapers except for steel and silkscreened gobos. Artwork should be as large as possible, but not bigger than 8½" x 11".

### Digital Artwork

Computer generated artwork allows for the highest quality gobo and the fastest delivery. Rosco prefers Adobe Illustrator or Photoshop files, though other graphics packages may be acceptable when saved in EPS or TIFF format. Do not submit low resolution file types like GIF, BMP, PICT, PCX and JPEG. Please convert fonts to outlines or include all font information.

Files may be sent as e-mail attachments to [customgobo@rosco.com](mailto:customgobo@rosco.com). Include gobo type, quantity, and delivery information in the e-mail message. **DO NOT SEND ZIP ARCHIVES OR OTHER COMPRESSION FORMATS WITHOUT CONSULTING WITH ROSCO.** Always confirm by phone that your files have been received by Rosco. We cannot accept responsibility for problems relating to electronic transfer of files.

Files over 5MB should be submitted on disk (ZIP, CD, Jazz) or contact Rosco for FTP information.

**For quick service and more information on custom gobos  
contact Rosco at 1-866-228-2256 or on the Rosco website at  
<http://www.rosco.com/gobocatalog/>**

**MIKE BALDASSARI** received Tony and Drama Desk nominations for "Cabaret", and received an Emmy nomination for "Garth Brooks Live from Central Park". Designs include Savion Glover's "Not Your Ordinary Tappers" and national tours of "The King and I", "Dial 'M' for Murder" and "Tommy Tune Moonlighting". As the American Associate Designer he has imported to Broadway: "Judas Kiss", "King & I", "Ideal Husband", "Racing Demon", "Indiscretions", "Hamlet", "Inspector Calls" and "Dancing at Lughnasa". Mike was the Lighting Designer for Neil Young's "Harvest Moon" Tour. TV designs include VH-1's "Eight Track Flashback" and MTV News' "Video Music Awards".

**KEN BILLINGTON** won a Tony Award for his lighting of "Chicago". He has designed over 50 Broadway productions including "Fiddler on the Roof", "Lettice and Lovage", "Tru" and "Sweeney Todd". He is also the principal lighting designer for Radio City Music Hall, where he has designed the Christmas and Easter shows for over a decade. Ken has won the Ace Award for his television designs and he has also won two awards for his architectural lighting.

**KIRK BOOKMAN** has designed over 60 regional theatre productions at various theatres including the Pittsburgh Public Theatre, the Virginia Stage and the Cincinnati Playhouse in the Park where he is the principal designer. He also designed "The Baby Dance" for the Lucille Lortel Theatre Off Broadway and "De Donde?" for the New York Shakespeare Festival. Opera credits include: "Pearl Fishers", "Rusalka", "Salome Manon" and "Desire Under the Elms" at City Center.

**ANDREW BRIDGE** won the Tony, Drama Desk and Outer Critics' Circle Awards for his designs for "The Phantom of the Opera". He designed the "Siegfried and Roy Spectacular" at the Mirage Hotel in Las Vegas and Eurodisney's "Buffalo Bill's Wild West" in France. West End credits include the musicals "Time", "Oliver", "An Evening with Tommy Steele", "Torville and Dean", "Bing Crosby" and many others.

**LISA CUSCUNA** is a graduate of The Cooper Union School of Art and Architecture. She has been designing projection environments for Broadway shows, world fairs, Olympic events, and museum installations for more than 20 years. Her technical experience covers a broad range of projection methods including single

screen projection, multi source projection, large format projectors, video wall systems and dark ride experiences.

Her work has appeared in the Broadway shows of producers Harold Prince, Trevor Nunn, Bob Fosse and Andrew Lloyd Webber. Her theatrical work is currently featured in the live stage show "Siegfried and Roy" at the Mirage Hotel and Casino in Las Vegas. It was also a major design component of the Broadway musical "Jane Eyre".

**JULES FISHER** has won six Tony Awards, more than any other designer. His Tony Award winning productions include "Noise/Funk", "The Will Rogers Follies", "Dancin'", "Grand Hotel", "Pippin" and "Ulysses In Nightgown". He has designed over 100 Broadway and Off Broadway productions including "Ragtime", "La Cage Aux Folles" and "Jesus Christ Superstar".

**PAUL GALLO** has designed the lighting for the Broadway productions of "Six Degrees of Separation", "The Little Foxes", "Grown Ups", "Come Back to the Five and Dime Jimmy Dean Jimmy Dean", "Heartbreak House", "The Mystery of Edwin Drood" and "The Front Page". He has received Tony nominations for "Anything Goes" (1988), "The House of Blue Leaves" (1986) and "City of Angels" (1990). He is the recipient of two Obie Awards and the Maharam Award.

**JOHN GLEASON** was the mentor and teacher of hundreds of students when he served as the Associate Chair of the Department of Design at New York University. On Broadway he designed over 90 shows including "Great White Hope", "Two by Two", "Lovers and Other Strangers", the Nichol Williamson "Hamlet", "The Woman", "My Fair Lady", "Hello Dolly", and "The Royal Family".

**DAVID HERSEY** is a truly multi-national designer. An American, he is a member of the National Theatre Company in London, has won Tony Awards in the US and the equivalent in the UK. His Tony Award productions include "Evita", "Cats" and "Les Miserables", which also received the Dora Mavor Moore Award. In addition, "Cats" received the Drama Desk and Dora Mavor Moore Awards. He has designed for over 100 shows including companies in the Americas, Europe and the Far East. His Broadway and West End credits include "Cats", "Starlight Express", "Les Miserables" and "Miss Saigon".

**ABIGAIL ROSEN HOLMES** joined Lightswitch in 1995. Her recent work includes the Sony Music portion of the 1995 NARM Convention, the Ford/Lincoln/Mercury Press Launch at the 1995 Detroit Auto Show, the Electronic Arts Exhibit at the 1995 E3 Convention, the Cleveland Bicentennial New Year's Eve Show produced by Walt Disney World, and the AT&T Exhibit at Innoventions in EPCOT Center. She has designed shows for Peter Gabriel, Pet Shop Boys, Fine Young Cannibals, The B52s, Herbie Hancock, Thompson Twins, Dan Fogelburg, and Talking Heads.

**ALLEN LEE HUGHES** has been represented on Broadway by "Mule Bone" and "Once on This Island" which earned his third Tony nomination. He is most remembered for "K2", which earned him his first Tony nomination, an Outer Critics' Circle Award, a Drama Desk nomination and a Joseph Maharan Award. His other designs on Broadway include: "Accidental Death of an Anarchist", "Strange Interlude" and "Quilters". His work has been seen at theatres throughout the country including the Goodman Theatre, Ford's Theatre, Kennedy Center, Lincoln Center, Guthrie Theatre and the Mark Taper Forum.

**NEIL PETER JAMPOLIS** has designed over 300 plays, operas, and ballets internationally, including sets for the Stratford (Canada) Festival presentation of "Carousel", American Ballet Theatre's "Nutcracker", NYC Opera's "The Cunning Little Vixen", and the recent Earl's Court (London) "Tosca". He was represented on Broadway by the production design for "Jackie Mason: Brand New", and lighting for the musical "Black and Blue", co-designed with Jane Reisman (Tony nomination for lighting design). Since 1976, Mr. Jampolis has been associated with the Pilobolus and Momim dance companies. He has also designed for the Metropolitan Opera, The National Arts Centre, Canadian Opera Company, National Ballet of Canada, Houston Grand Opera, Santa Fe Opera, Cincinnati Opera, and New York City Opera among others.

**LUC LAFORTUNE** is an award winning Lighting Designer. His awards include The Lighting Dimensions International Award for Lighting Designer of the Year in 1994 and The Drama-Logue Award in 1992 for his design for Cirque du Soleil's "Saltimbanco". He has designed over 14 tours for Cirque du Soleil including their "Quidam" North American Tour.

**MING CHO LEE** has worked with many prestigious dance companies, including Martha Graham, American Ballet Theatre, Joffrey Ballet and the Royal Danish Ballet. From 1962 through 1973 he was the principal designer for Joseph Papp's New York Shakespeare Festival. He has designed sets for the Metropolitan Opera, New York City Opera, Lyric Opera of Chicago and San Francisco Opera as well as for theatres including Arena Stage, Guthrie Theatre and Covent Garden. His numerous awards include a Tony, New York Drama Desk and New York and Los Angeles Outer Critics' Circle Awards.

**THOMAS J. MUNN** has designed scenery and/or lighting for Broadway, Off Broadway, regional theater, ballet, and industrials. Since 1976 he has been the resident lighting designer for the San Francisco Opera, where he has created the lighting and special effects for over 150 productions, including the highly acclaimed "Ring" productions in the '85 and '90 seasons. He continues to design and consult for companies throughout the world.

**THARON MUSSER** has received three Tony Awards for her work as a lighting designer for "Follies", "A Chorus Line", and "Dreamgirls". Her many contributions include being the first lighting designer to use a computer lighting system on Broadway. She has designed plays and many musicals and operas around the world. Her work on Broadway includes "Jake's Women" which features her gobo "Amorphous", "Lost in Yonkers" and "The Secret Garden".

**RICHARD NELSON** The late designer's Broadway and Off Broadway credits include "Into the Woods" (Tony and Drama Desk nominations), "Sunday in the Park with George" (Tony, Drama Desk and Maharem Awards), "The Secret Rapture", "Morning's at Seven", "Cafe Crown", "Blithe Spirit", "Loot", "Precious Sons", "Present Laughter", "The Tap Dance Kid", and "The Magic Show". He was principal lighting designer for the dance companies of Merce Cunningham, Jose Limon, Louis Falco, Jennifer Muller, Laura Dean and Anabelle Gamson, and has also lighted the repertoires of Alvin Ailey, Martha Graham, Netherlands Dance Theatre, and the Boston, Cleveland, Rio de Janeiro and Paris Ballets.

**DENNIS PARICHY** has designed over 350 productions during his career. He has been resident designer for The Circle Repertory Company since 1976, has frequently designed for The Manhattan Theatre Club, The Acting Co., and is the lighting designer for Penn & Teller. His Broadway credits include "Coastal Disturbances", "Burn This", "As Is", "Crimes of the Heart", "Talley's Folly", "Fifth of July", and "The Water Engine". He has received an Obie, a Drama Desk Award, Maharam and Drama-Logue Awards and two Tony nominations for his designs.

#### **DOUGLAS W. SCHMIDT**

Over the course of his career, Douglas W. Schmidt has accumulated enough frequent flyer points to vacation on the moon, having designed more than 150 productions for theatre, opera and television in the U.S. and abroad. Near to Mr. Schmidt's heart are the definitive "Three Penny Opera" for Richard Foreman and the New York Shakespeare Festival, Neil Simon's "They're Playing Our Song", the San Francisco Opera's "Aida" starring Luciano Pavarotti, and Jack O'Brien's "Porgy and Bess" at Radio City Music Hall.

**THOMAS R. SKELTON** The late Tom Skelton was an artist truly revered in the entertainment industry. He began his lighting career as an apprentice to Jean Rosenthal. He went on to inspire other great designers including Jennifer Tipton and Paul Gallo. Skelton was a brilliant lighting designer and innovated color techniques for both theatre and dance. He designed for the Joffrey, New York City Ballet, Paul Taylor, Jose Limon, and the Ohio Ballet which he co-founded. His Broadway credits include "A Few Good Men", "Peter Pan", "Oklahoma!", "Brigadoon", "The King and I", "Carousel" and the revivals of "The Iceman Cometh" and "Death of A Salesman". He received 3 Tony nominations, the Carbonelle Award and the Los Angeles Drama Critics' Award during his career.

**JENNIFER TIPTON** is a well known lighting designer for theatre, dance and opera. Her many lighting awards include two Bessies, two Tonys, a Joseph Jefferson Award, a Kudo, one Drama-Logue Award, two American Theatre Wing Awards, an Obie and two Drama Desk Awards. Ms. Tipton also teaches lighting at the Yale University School of Drama.

**ROBIN WAGNER** is one of the most prolific and successful scenic designers in the industry. His Broadway credits include such hits as "42nd Street", "Dreamgirls", "A Chorus Line", "On the Twentieth Century", "Ballroom", "Mack & Mable", and "Seesaw". He has designed for The Vienna State Opera, the Hamburg State Opera, The American Ballet Theatre, the Arena Stage in Washington, D.C. and the American Shakespeare Festival. His many awards include the Tony, the Drama Desk, Drama Critics' Circle and Maharam.

**TONY WALTON** has won both Tony and Drama Desk Awards for his designs for "The House of Blue Leaves" and "Pippin", and a Drama Desk Award for "Social Security". Other shows which have earned Tony nominations are "The Will Rogers Follies", "Grand Hotel", "Anything Goes", "Lend Me a Tenor", "The Front Page", "The Real Thing", "The Apple Tree", "Chicago" and "A Day in Hollywood/A Night in the Ukraine". Other designs include "Six Degrees of Separation", "Waiting for Godot", "I'm Not Rappaport", Linda Ronstadt's "Canciones De Mi Padre" and Bette Midler's "Clams on the Half Shell". He won an Emmy Award for his design of Dustin Hoffman's "Death of a Salesman".
