

Taco Bell Drive-Thru kit in HO scale

Parking lot base and cars not included

This kit includes all parts milled in white styrene plastic and self adhesive decals. All parts fit together but may need light sanding in joints for cosmetic reasons. The model needs painting.

Some model building and painting skills are required.

Manufactured by Custom Cuts by

Assembly instructions for Taco Bell Restaurant

Thank you for buying this Taco Bell Drive-Thru kit. Please take some time to read these instructions before you begin assembling.

This kit is milled in styrene plastic and is very easy to glue together using Plastruct Plastic Weld or similar glue products.

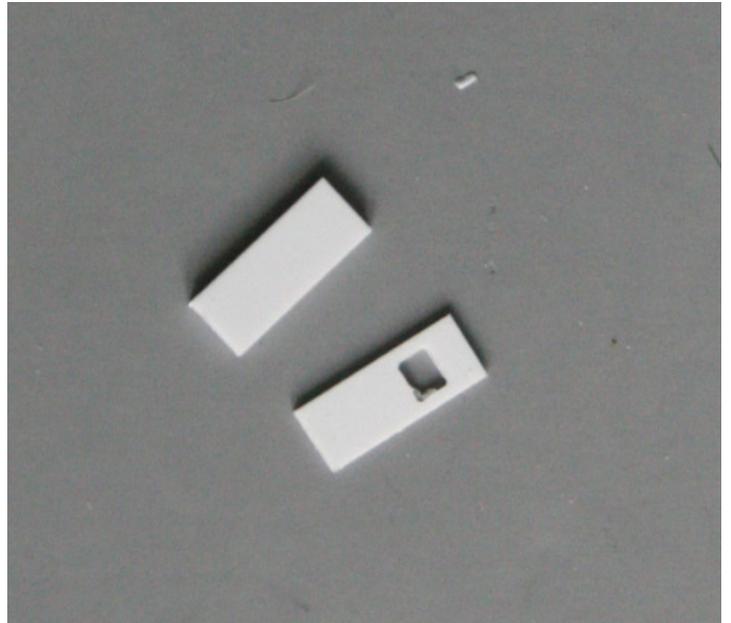

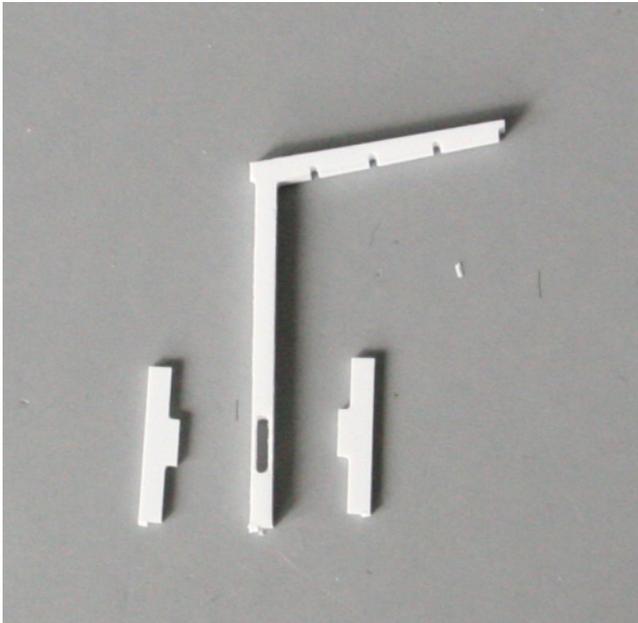

Take your time to identify all parts, lay them out and clean them for any burrs before gluing them together.

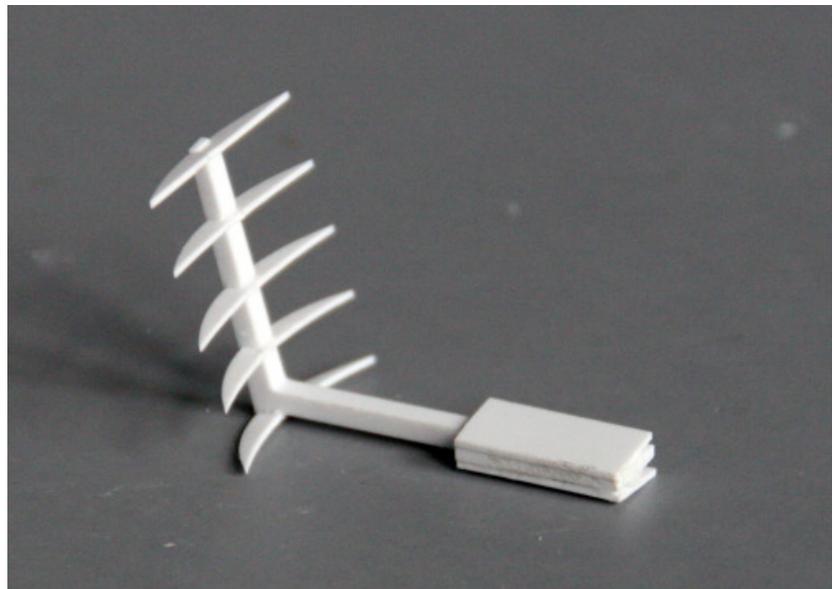

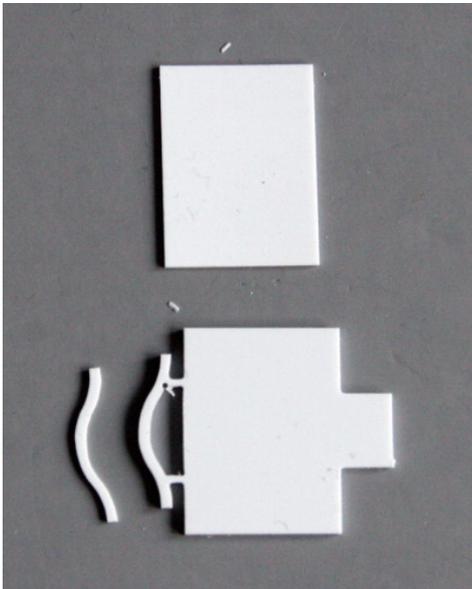

Parts overview

Remove the parts from the sprue and cut/file away the burrs.

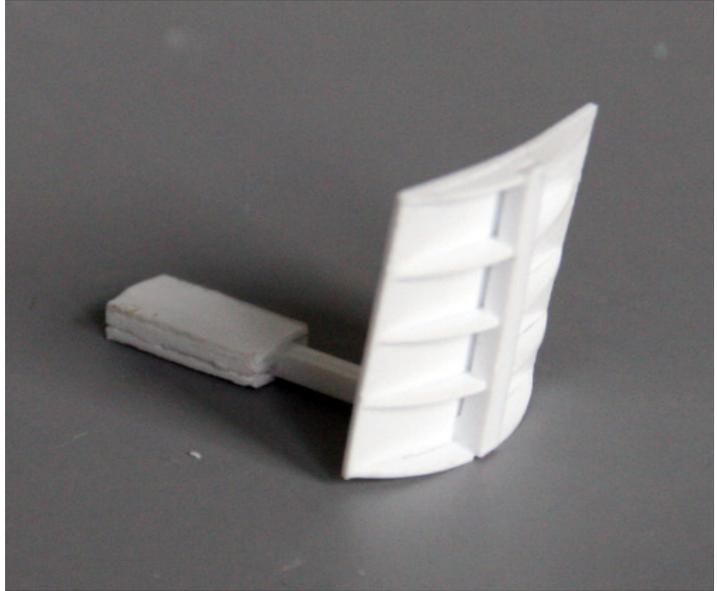

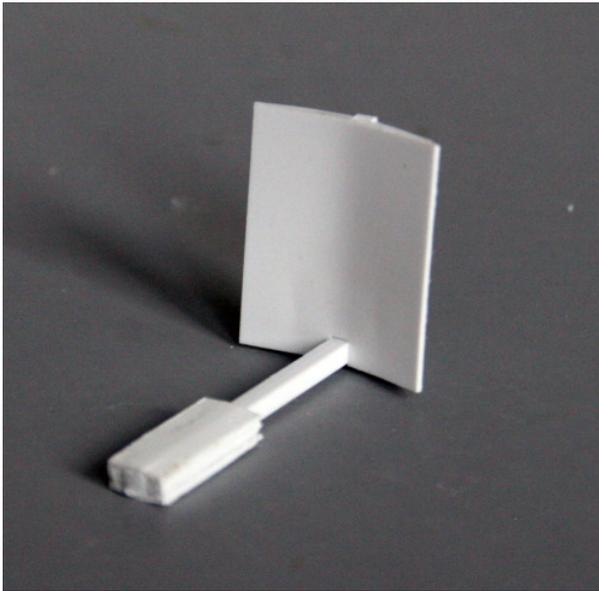

Assembly

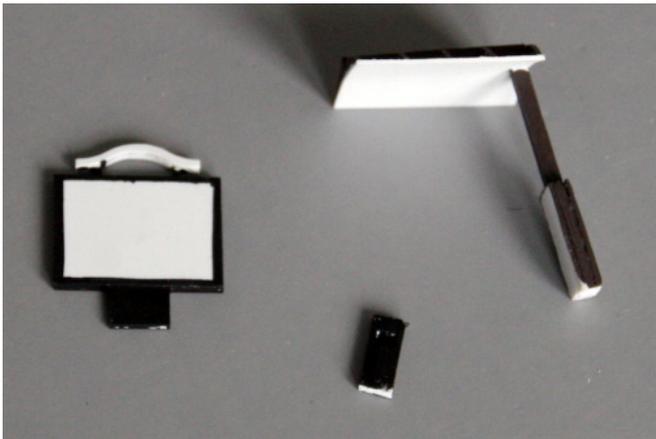

Glue the small side pieces on each side of the canopy cantilever pole. Laminate the call-box front to the box.

Laminate the two thin menu pieces to the menu base. Glue the canopy support brackets to the cantilever arm as shown in the picture – the tightest radius closest to the pole. Glue the bottom sign faces on each side of the base, one side at a time. Hold the joint together with a wooden clothespin until dry, then glue the other side.

Glue the canopy ceiling in place, hold with your fingers or a clothespin until the glue sets.

Paint the call box and the menu board satin black, except the top trim. Paint this white. Paint the Canopy pole and support brackets dark brown.

Before handling the decals, you should protect the print with a coat of Krylon Clear Acrylic spray or Testors Dullcote. Cut out the decals with a sharp hobby knife. Apply the decals as shown.

Paint the decorative wall a terra cotta or rust brown color.

Arrange the parts as shown on the cover photo or in a way that will fit your floor plan.
