

Lowe's street sign kit in HO scale

This kit includes all parts milled in white styrene plastic and decals. All parts fit together but may need light sanding in joints for cosmetic reasons. The model needs painting.

Some model building and painting skills are required. Size: 6" x 3 1/2" (150 x 90 mm)

Manufactured by Custom Cuts by 

Summit USA LLC, 512 Ford Street, Lake Charles, LA 70601

Assembly instructions for Lowe's street sign

Thank you for buying this Lowe's street sign. Please take some time to read these instructions before you begin assembling.

This kit is milled in styrene plastic and is very easy to glue together using Plastruct Plastic Weld or similar glue products.

Take your time to identify all parts, lay them out and clean them for any burrs before gluing them together.

Parts overview

Glue the logo faceplates onto each side of the basic sign, then glue on the top trim and the lower leg pieces onto each side.

Painting

Paint the sign light gray. When dry, mask off and paint the top trim dark blue.

Final assembly

Cut the logo decals with a sharp hobby knife, remove the backing paper and mount the logo on the sign as shown in the picture.

You may want to protect the decal print before handling by applying a thin coat of Testors Dull Cote before cutting.

The colors used on this model are:

Testors #1726 Light sea gray, Testors #1772 Blue Angel Blue
